

Artichoke Joe's Casino We Have Clean Air!!!

As we move our casino operations indoors, we are excited to share the progress our property has made in assuring your health continues to be our top priority.

Our advanced, hospital-grade HVAC system inducts 90% of our air from the outside, this air is filtered with MERV 13 filters, not once, but twice! Recently, we installed UV-C light filters in our system to attack and destroy any remaining bacteria.

Artichoke Joe's Casino will continue to regularly maintain and upgrade our HVAC system to provide our guests and team-members with safe, healthy and the cleanest air available.
